Blend characterized by **70% of Robusta** coffee, it represents our most intense solution both in percentage of caffeine and on the profile of the cup. The organoleptic characteristics of Robusta coffees give a marked creaminess and body while Arabica coffees, even in small quantities, give notes of dark chocolate.

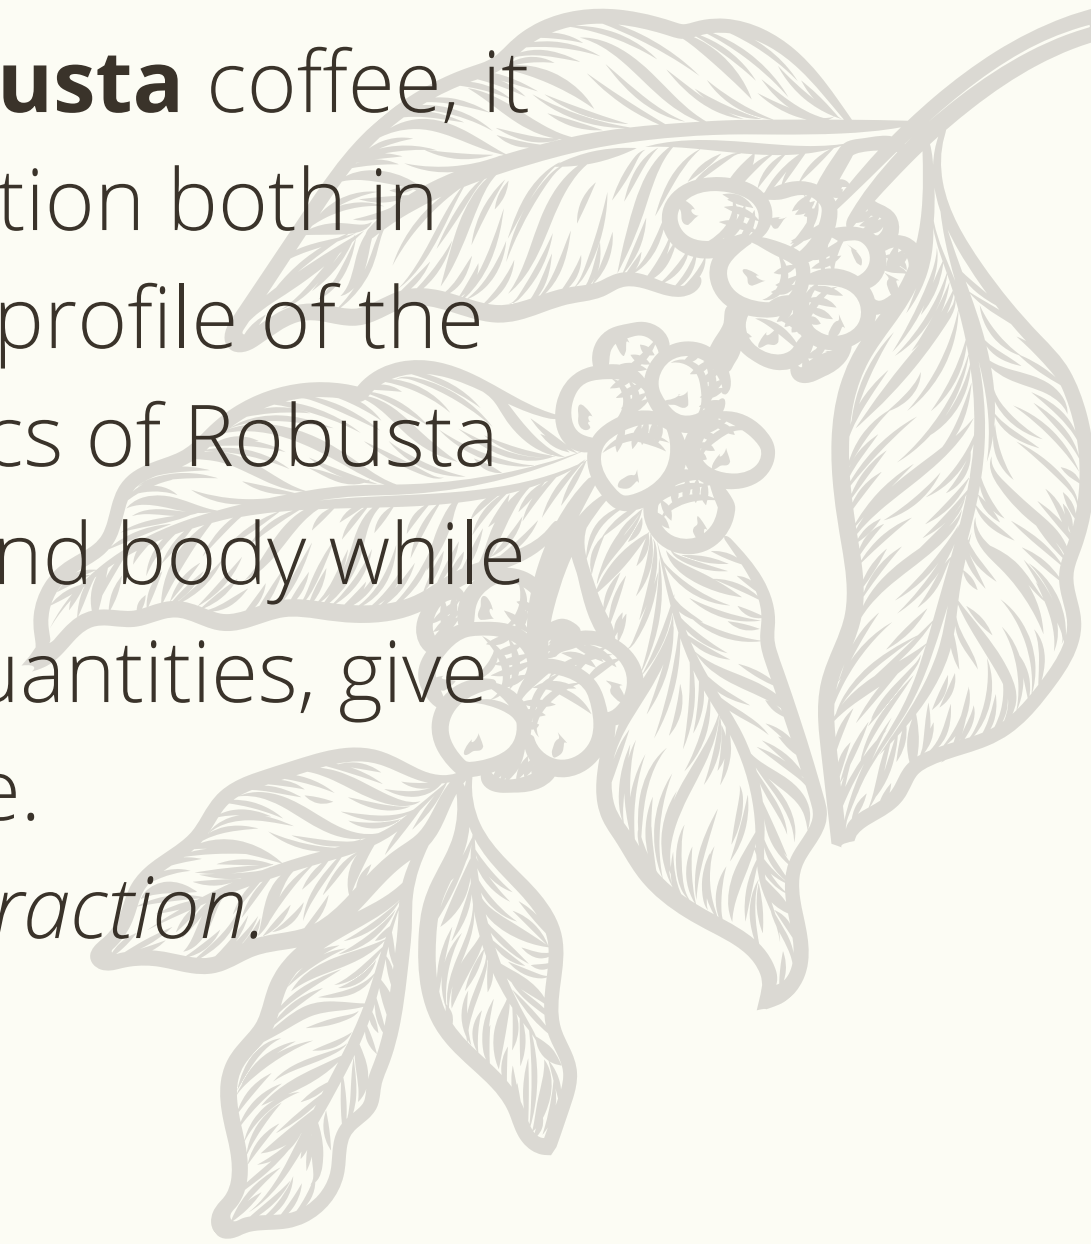

It is suitable for any type of extraction.

This blend represents the perfect balance between the two different types of coffee, composed of **70% Arabica** in the cup, it presents a round-bodied coffee with a sweet flavor characterized by caramelized and hazelnut notes that will remain persistent even after tasting.

It is suitable for any type of extraction.

With **95% Arabica** coffee it is one of our most sophisticated solutions, in the cup it has little body typical of its nature. A sweet coffee with a sweet persistence characterized by notes of dried fruit and licorice, thanks to the single origin of Robusta it creates an excellent combination with a honeyed aftertaste.

It is suitable for any type of extraction and its reduced percentage of caffeine makes it ideal even after dinner.

It is suitable for any type of extraction.

Special blend of **decaffeinated** coffee perfect for those who do not want to take caffeine. The very high quality of the Arabica coffees used make it equivalent to a classic espresso, presenting a delicate body and a precious velvety cream. It is suitable for any type of extraction.

It is suitable for any type of extraction.
