OUR STORY

PASSIONATE ABOUT OLIVES

Lucarelli Alferino Srl is an Italian company located in region Lazio in **Rocca Massima (LT)** which has been operating in the food sector since 1949. For **over 70 years** our company has been specialized in the production and distribution of **table olives**, but also lupins, capers, pickles, vegetables preserved in oil and Extra Virgin Olive oil Itrana Monocultivar.

Passion is what has driven us for years to cultivate our lands, rich in culinary history, and to market the fruits of our love for the territory, handing down the passion from father to son.

We process about **18 cultivars** in many different forms. Some of our top products, as **GAETA DOP olives** and **ITRANA olives**, can be considered a symbol of local excellence since they are produced in Rocca Massima (LT) where the company is located.

The company covers an area of 20,000 square meters, 5,000 square meters of which are covered and allow a storage capacity of about 15,000 quintals. The production capacity is of 200/250 quintals per day with a production staff of over 35 people.

Lucarelli company stands out for its **flexibility** as its major strength is **customization**: our company can provide customized solutions to fulfill specific requests of different target markets.

Lucarelli Alferino SRL is **IFS** and **BRC FOOD** certified and it is registered with the Consortium for the protection and enhancement of Gaeta DOP olive.

Our aim is to provide our customers with **the highest quality products**. Hence, we carefully select only the best raw materials and we pursuit quality in every phase of production, packaging and marketing.

Olives

HEALTH BENEFITS OF OLIVES

CARDIOVASCULAR BENEFITS OF OLIVES

Free radicals oxidise LDL cholesterol. When this happens, blood vessels are damaged. As a result, fat continues to accumulate in the arteries increasing the risk of a heart attack. The large quantities of **antioxidants present in olives** (polyphenols, beta-carotene, vitamin E) prevent this process.

NATURAL IBUPROFEN

Another interesting property of olives is that they are rich in polyphenols. Among polyphenols, a particular molecule named "oleocanthal" has been recently identified. This substance is said to act as a natural analgesic and therefore has **anti-inflammatory properties**.

SKIN WELL-BEING

The **vitamin E** contained in olives also has many other properties. For example, it nourishes, moisturises and protects the tissues, thus prevents skin diseases and protects the skin from ultraviolet radiation.

SOURCE OF IRON

Olives are also an excellent source of minerals. They have a good amount of **calcium, potassium, magnesium and sodium**. They are also particularly **iron-rich**.

PRODUCTION & SUSTAINABILITY

GREEN ENERGY FROM SOLAR PANELS

Lucarelli Alferino SRL has always paid great attention to **hygiene and health regulations** in its 3000 square metres of warehouses built embracing the philosophy of **eco-sustainability**. It is indeed among the first structures in Italy to have used **photovoltaic energy** in order to reduce environmental impact.
